

FRANCISCO WYLKER REIS COELHO

Senior QA Analyst (SDET) | Test Automation Specialist

Fortaleza, Ceará, Brazil | (85) 98675-9454 | wylker@outlook.com | [linkedin.com/in/wylker-reis](https://www.linkedin.com/in/wylker-reis)

PROFESSIONAL SUMMARY

Senior QA Analyst (SDET) with nearly 7 years of experience in test automation and manual testing across front-end, back-end, and APIs in the financial and technology sectors. Designed and led automation frameworks that replaced manual weekend processes with continuous CI/CD execution — for example, reducing a banking regression cycle from 2 QAs working 4 hours to a few minutes of automated review. Proficient in Playwright, Cypress, Selenium, Robot Framework, Parasoft, JMeter, and K6, with experience in Python, TypeScript, C#, JavaScript, Java, and SQL. Tests HTTP APIs using Postman and Swagger, uses application logs and monitoring tools (Kibana/ELK, Datadog) to investigate failures, and has strong SQL knowledge with databases such as SQL Server. Mentored around 12 QA professionals, led code reviews, and introduced BDD/Gherkin and Page Object Model practices in agile teams (Scrum/Kanban). Track record built at QAT Global, Paraná Banco, ACT Digital (BTG Pactual and Banco ABC), AjaxTI (Siemens and Vale), and Pague Menos. Maintains personal automation projects to stay current with modern market tools. Fluent in English, intermediate Spanish, pursuing a Bachelor's in Computer Science (expected 2027).

Skills

Proficient: Python, TypeScript, JavaScript, Java, C#, SQL, Playwright, Cypress, RobotFramework, Selenium, Parasoft, Postman, SoapUI, JMeter, K6, Scrum, Kanban, BDD/Gherkin, CI/CD, SQL Server, MongoDB, Oracle, Kibana/ELK, Datadog

PROFESSIONAL EXPERIENCE

Senior QA Analyst | QAT Global

Oct 2025 – Present

- Restructured the regression suite (~600 test cases) into domain-based smoke and sanity categories, cutting pre-deploy test time from 15 to approximately 3 minutes while keeping full regression available on demand.
- Leads functional, non-functional, regression, acceptance, and security testing using Parasoft.
- Tests HTTP APIs using Postman and Swagger, manages test lifecycle, and tracks defects through Azure DevOps.
- Stack: Parasoft, Postman, Swagger, MongoDB, SQL Server, Git, Azure DevOps.

Senior QA Analyst | Paraná Banco S/A

May 2024 – Oct 2025

- Led a proof-of-concept and automation rollout using Python + Robot Framework, replacing a manual weekend process (2 QAs, ~4 hours) with automatic CI/CD execution, leaving only result review for the QA.
- Expanded automation adoption from 1 to 4 squads.
- Designed and executed functional, regression, acceptance, and security test cases; ran load/stress/performance tests with K6.
- Investigated test and production failures using Kibana/ELK and Datadog, along with SQL Server queries for data validation.
- Partnered with the Salesforce squad, led code reviews, and presented internally on the value of automated testing.
- Stack: Robot Framework, Python, C#/.NET, K6, Postman, Swagger, MongoDB, SQL Server, PyTest, Git, Azure DevOps.

Senior QA Analyst | ACT Digital

Jul 2021 – May 2024

- Delivered and maintained test automation for two major clients: BTG Pactual (~1,000 test cases) and Banco ABC (~600 test cases), covering front-end, back-end, and API layers.
- Segmented the Banco ABC automated suite by flow, saving an average of 10 minutes per run.
- Used Kibana/ELK and Datadog to investigate production failures across both client accounts; tested APIs with Postman and Swagger on both projects.

- Tracked suite quality metrics such as defect detection rate and false-positive (flaky-test) rate, alongside execution time.
- Onboarded and mentored around 12 QA professionals; coordinated code reviews and introduced BDD, Gherkin, and Page Object practices.
- BTG Pactual (1.5 years): C# + Selenium/.NET; K6 for load/stress/performance; Postman, Swagger, Jenkins, Oracle, Azure DevOps, Git.
- Banco ABC: Python + Robot Framework for full-stack testing; JMeter for load/stress/performance; PyCharm, Jenkins, PyTest, SQL Server, Git, Azure DevOps.

QA Analyst | AjaxTI

Jan 2021 – Jul 2021

- Automated and executed manual, non-functional, API, and regression tests for two clients, managed through Azure DevOps.
- Siemens (~200 cases): UI and API scripts with Java + Selenium, supporting a factory's input/output and material-loss calculations; K6 for performance/stress; Azure DevOps, Git, MongoDB.
- Vale (~300-400 cases): UI scripts with Cypress + JavaScript for an ore-enrichment platform, covering raw material input, enrichment type, and total production output; JMeter for load/stress; Azure DevOps, Git, SQL Server.

QA Analyst (started as Junior/Trainee) | Pague Menos

Oct 2019 – Dec 2020

- Automated the 50 most critical scenarios of the weekly regression using Cypress + JavaScript, eliminating the Saturday shifts that used to supplement the 3-QA, 8-hour manual testing every Friday.
- Participated in the rollout of Azure DevOps within the Integrador PBM squad.
- Stack: SoapUI, SQL Server, Swagger, Azure DevOps.

EDUCATION

Bachelor's in Computer Science — Estácio, Ceará

Ongoing, expected 2027

CERTIFICATIONS

Scrum Foundation Certificate (SFC) — CertiProf, June 2020
